## Plan Description

A covered front porch and a pair of gables establish a sense of comfort on this 1,906 sq. ft., 1-story house plan. Inside, a few steps bring guests into the great room, with its fireplace, views to the rear and boundary-defining cathedral ceiling. The kitchen and dining area lie open to the great room for comfortable entertaining. The kitchen itself is well-appointed, with an island work station, generous counter space, and a walk-in pantry. The dining area accesses the covered patio through sliding doors. Just off the kitchen, a mud room with bench and lockers accesses the home's 3-car, front-load garage. All sleeping quarters reside on the other side of the home, where the master suite is tucked away for privacy. Its bath area features his-and-her vanities, a compartmented toilet and a sizeable walk-in closet.

Bedrooms 2 and 3 are separated from the master suite for privacy. Both secondary bedrooms share a central hall bath that features a double sink vanity that lies outside the bath area.
